

# The Engaging Stakeholders Network

---

Powered by

**SustainAbility**

## A business hub helping organisations create a sustainable world.

SustainAbility is a world respected advisory firm and think tank inspiring and enabling business to move towards a just and sustainable world.

Formed over 20 years ago, the Engaging Stakeholders network's role is to collectively push the sustainability agenda by providing cutting edge research, tools and insights to sustainability professionals.

This is achieved through a framework that offers professional access to experts and peers in intimate ways - both in person and online. We focus on key issues and involve a broad range of sectors.

*“The network is driving best practices in corporate transparency and accountability. Together our members are connecting in ways that are changing the culture of their businesses.”*

Mark Lee, Executive Director, SustainAbility

Some members  
driving the agenda...

## Access to peers, experts and your own personal liaison.

Inclusivity and accessibility are at the heart of the network. Our members actively shape and inform the agenda

The Network comprises group discussions on trending topics, peer feedback and advice and monthly briefings with you and your team.

We balance peer based activities with learning from experts. A dedicated SustainAbility liaison works with you on the specific challenges you are addressing.

“Well-facilitated and candid discussions are the backbone of the network, but the lifeblood is the quality of interactions with the people involved. That is what makes it unique and valuable!”

Anne Gadegaard,  
Global Director TBL (Triple Bottom Line) Management,  
Novo Nordisk

### Workshops

### Online Forum

### Webinars

### Briefings

## The big event. Annual workshops.

We come together in person once every year in Europe and North America for workshops which provide opportunities to network, collaborate and share, meet experts, and rally around key topics.

“A perfect venue to keep abreast of emerging issues and tackle challenging corporate responsibility topics together. The diversity of perspectives and commitment of companies in the network offer a valuable source of intelligence and innovation.”

Rob Frederick, VP and Director,  
Corporate Responsibility, Brown-Forman

BROWN-FORMAN

## Leading thinking and research on the transparency agenda.

Each year the SustainAbility team works with the members to agree a key topic that would benefit from a collaborative project. We help to solve common problems our members face through practical guidance and case studies.

Using primary and secondary research, we provide a detailed report exclusively embargoed for our members. Throughout the year we also provide thought leadership and insights into the transparency agenda, which we interpret and summarise to save you time.

We push the envelope and ensure you have access to intelligence and opinions you won't find elsewhere.

If you would like to see our most recent reports, [click here](#).

## Dedicated briefings.

We know from experience that a key aspect of the Network is being able to positively and directly impact on your day-to-day.

Your liaison works with you throughout the year to discuss key issues and help you apply the experiences and insights from the network activities directly into your business.

Members tell us that the Network's intimacy allows for deeper exploration that, in turn, helps better inform the network's focus for tomorrow.

Your liaison also delivers an annual member briefing tailored to your needs, ensuring the content, delivery and timing is highest value for you.
